

About the company

Check it Easy is a Kilpatrick company an international consulting group focused on the human resources sector. We create a digital solution not only for employers to check a candidates details, but also for a person to get an Official Certification of their experience, that can be used in future career steps.

Who we are

mission and vision

Check it easy is a platform dedicated to background validation digitally, backed by Kilpatrick, a company dedicated to Human Resources solutions with more than 20 years of experience in the market.

Mision

Offer an Official Certification through high quality background validation solution, that provides an efficient and safer network.

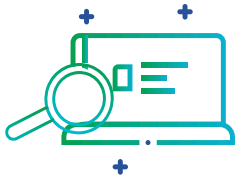

Vision

To be the leading and the point of reference throughout the world regarding Official Certification through high quality background validation solutions. to be recognised as a trusted global company chosen for our innovation, solutions and services

What we do and how we do it

What?

Check it easy is an online platform where employers can check the candidates details, identity, preview experience, criminal records, social media, credit bureau, education etc; everything made to the average and specific needs of each client.

Also for the candidates side is an option to get an Official Certification of their experience, that they can use in any of their future career steps.

How?

The whole process is simple and is done digitally. Once the validation has been requested by the client with the necessary parameters, the candidate will receive an email with the details to enter the platform. The platform is very easy to use and guides the candidate step by step to load the necessary information. Once the process is finished, the Check it Easy validation team is in charge of checking that the information is correct and validating it. The validation process is 50% digital and 50% manual.

At the end, a PDF report is delivered with the details and comments of the validator as well as a risk meter.

What make us different?

Check it Easy is the first platform that allows the entire background validation process to be carried out through the candidates, eliminating the triangulation between the client and the candidate. It is also the first digital platform aimed directly at people without the need to complete the request through a company.

Types of BGC

Check it easy has different types of validations always 100% tailored to our clients, we have 11 different types that can be added according to our clients needs:
